Communication Plan

Project Demonstration

Project: Global Fuel Prices and Taxation Trends | Prepared: 25 October 2026 | Owner: Rudraraj Singh Bhati

This is a solo project. The communication record below describes practical communication channels for a solo student and mentor review, rather than implying a team of members or meetings that were not documented.

No.	Communication type	Frequency	Channel / tool	Participants	Purpose
1	Self progress review	At each work session	SkillWallet checklist / local notes	Project owner	Track completed tasks and next required deliverable.
2	Mentor update	As instructed / milestone-based	SkillWallet / mentor communication channel	Project owner and mentor	Confirm template and evidence requirements.
3	Issue resolution	As needed	Tableau Desktop, browser and VS Code troubleshooting notes	Project owner	Record broken links, filter behaviour, file-path or embed issues.
4	Review of output	Before submission	Tableau Public links and screenshots	Project owner / mentor	Validate dashboard, Story, website and documentation.
5	Final demo rehearsal	Once before recording	Screen recording rehearsal	Project owner	Check 5–7 minute duration, readable browser and audio.

Communication challenges and resolutions

No.	Challenge	Resolution / action
1	Hero background image failed to load because of a filename/path mismatch.	Standardize filename and HTML path to Static/img/hero-bg.png; hard refresh browser.
2	Story and dashboard needed separate validation.	Use their separate Tableau Public links and check dashboard rendering plus all seven Story scenes.
3	Template repository entries did not contain substantive files.	Prepare this populated documentation pack for manual upload; the current GitHub repository placeholders need replacing.
