Demonstration of Proposed Features

Project Demonstration

Project: Global Fuel Prices and Taxation Trends | Prepared: 25 October 2026 | Owner: Rudraraj Singh Bhati

No.	Feature	Description	Status	Demonstrated?	Remarks
1	Data scope summary	Report records/fields, time span, country and region coverage.	Implemented	Yes	Figures are project-reported.
2	Data quality checks	Missing-value, duplicate, standardization, mapping, outlier and temporal checks.	Implemented in workbook	Show in recording	Some diagnostic sheets are not part of the main dashboard.
3	Interactive dashboard	KPI cards, maps, trends and taxation/country comparisons.	Implemented	Yes	All visible charts rendered in tested session.
4	Interactive filters	Date, Region, Income Level, Subsidy Level.	Implemented	Yes	All four updated correctly in user test.
5	Seven-scene Story	Narrative from problem through findings and conclusions.	Implemented	Yes	User confirmed all seven scenes navigable.
6	Web integration	Flask/HTML homepage with published views embedded/linked.	Implemented per project workflow	Verify during recording	Use screenshot from final local browser.
7	Snowflake/SQL pipeline	Database warehouse and query pipeline.	Not implemented / N/A	No	Do not demonstrate or claim this feature.

Implementation summary

Implemented features should be counted from items 1–6 only after the relevant current interface is visible in the final recording; item 7 is deliberately marked not implemented. Since web integration is in progress as a student deliverable, confirm its current local rendering before claiming it passed.
